Project title	Ion Creanga, M. Viteazul and Basarabia renovated streets and the roundabouts in Ialoveni town
Location	Ialoveni town
Applicant	Ialoveni town hall
Partners	Ialoveni rayon council
General objective	Reconstruction of the Ialoveni roundabouts in Ialoveni for mantaining rainwaters and directing them through Isnovat flow drains into the river to assure the safety of vehicles and pedestrians
Short desription of the project	The project targets repairing the roundabout construction of national importance, with an area of 4706 square meters, ensuring increased road safety in the region by 80%. The trend of development and growth will increase the traffic in the town by 55%. The 4706 square meters that occupy the existing roundabout, about 50 000 - 100 000 regional inhabitants and private entepreneurs, of which about 25% to 35% benefit from the services daily. After renovating the roundabout the number of people and businesses who will use the road sector will increase from 150 000 to 200 000.
Results	Collection of groundwater, rainwater and channeling them through Isnovat flow drains into the river to ensure the safety of vehicles and pedestrians Creating water storage wells on Alexandru cel Bun, Bessarabia, Stefan cel Mare streets Construction of underground drainage channel water from the fountain of the central part of roundabout to street drains from Basarabia street Installation of traffic signs and pedestrian crossings
Current status of the project	In search for financial resources
Implementation period	8 months
Costs	9 643 960 Lei
