

Project title	PROVIDING VILLAGES BARDAR, RUSESTII NOI AND VĂSIENI FROM RAYON IALOVENI WITH NEW SEWAGE SYSTEM
Location	Ialoveni rayon, Bardar, Văsieni, Ruseștii Noi villages
Applicant	Bardar town hall, Ialoveni rayon
Partners	Bardar town hall Văsieni town hall Ruseștii Noi town hall
General objective	Improving quality of life in Central Region, Ialoveni rayon by developing sewerage infrastructure
Short description of the project	<p>Construction of a sewage system with a length of 50 km will create access to sewage water for 15,000 inhabitants from Ialoveni. The three locations: Bardar, Văsieni and Ruseștii Noi could easily benefit from the sewer system due to the existing Factory "Winery Bardar", which is connected to a sewerage network created for about 1/3 of Bardar village households. Sewage is one of the biggest problems in this sector, as its absence leads to environmental pollution.</p> <p>The problem is very serious from the social, economic and environmental point of view.</p> <p>Giving people access to safe water in these villages, we will essentially improve the quality of human life and will contribute to economic development in the region, making possible the production and reduction of socio-economic disparities at regional level.</p>
Results	Modern sewage infrastructure Access to sanitation Economic Development for three villages Better health and longer life expectancy Increasing the capacity of administration and management of the municipal enterprises Improved quality of life for local people
Current status of the project	Currently, there is sanitation project for about half of the households of the village, including treatment plant from Bardar and wine factory, that was developed in 1974. It is necessary to elaborate pre-feasibility study for the village sewer system from Bardar, Ruseștii Noi and Văsieni.
Implementation period	18 months
Costs	45 000 000.00 Lei
