

<b>Project title</b>	Extention and modernisation of the local existent waste management system in Orhei and four other neighbour rural localities
<b>Location</b>	Orhei town and 4 ( <i>four</i> ) other neighbour rural localities (Step-Soci, Mitoc, Pelivan, Bolohani villages)
<b>Applicant</b>	Orhei townhall
<b>Partners</b>	<ul style="list-style-type: none"> <li>• Mitoc townhall</li> <li>• Pelivan townhall</li> <li>• Step-Soci townhall</li> <li>• Bolohan townhall</li> </ul>
<b>General objective</b>	Improving environmental quality, respectively Orhei and neighboring villages population health by extending and modernising sanitation sytem
<b>Short project description</b>	<p>In Orhei town and its neighboring villages is registered a poor environmental situation and a poor ecological culture and it has negative impact on population health in the region. Orhei town polygon is located in the town's residential area and at present is full. Leakage of toxic substances resulting from degradation of waste discharge directly into the river Raut. The proposed project will improve the general situation of the Orhei town and the four neighboring rural areas, and will minimize negative impacts on environment and population health, ensuring the appropriate sanitarian ecological standard, preventing pollution of land and water sources.</p> <p>In order to solve the complex problem of sanitation and sustainable land planning, it is planned the creation of a new communal regional integral sanitation system, its providing with technical support, creation of appropriate infrastructure for storage, transportation, storage and waste recovery. New waste management system requires the purchase of two specialized transport units, equipped with advanced equipment that would allow the transportation of waste stored in the town and nearby villages in terms established under the disposal of schedules for waste disposal. As well, it will be possible to construct, to plan and to provide platforms with equipped special containers.</p>
<b>Results</b>	<p>Selective collection with two specialized transport units</p> <p>Construction of 33 platforms equipped with 132 mobile containers and 1000 bins</p> <p>Population with a greater level of awareness and responsibility</p>
<b>Current status of the project</b>	In search for financial resources
<b>Implementation period</b>	12 months
<b>Costs</b>	4 548 045 lei
