

<b>Project title</b>	A GOOD ENVIRONMENT FOR REGIONAL SUSTAINABLE DEVELOPMENT
<b>Location</b>	Hîncești RAYON, Hîncești TOWN AND VILLAGES Bozieni, Mereșeni și satul Logănești
<b>Applicant</b>	Hîncești town hall
<b>Partners</b>	Bozieni, Mereșeni and Logănești town halls
<b>General objective</b>	Developing regional initiatives to improve environmental factors in Hancesti rayon reducing the negative impact of solid waste on the environment
<b>Short description of the project</b>	<p>Burning waste affects more than the air. Installed bins in the town are revealed, so the wind, the animals scatter their contents across the town. Unauthorized dumps pollute the environment.</p> <p>District epidemiological health service is alarming, presenting a direct link between decreased indices of health and environmental status. Specilaised sanitation service from component municipal enterprise "Amen-Ver" does not have specialized sanitation technology, nor trained personnel. Implementing this project would contribute to the creation of a regional integrated solid waste management partner that would give localities the opportunity to join efforts to solve long-term environmental problems.</p> <p>However, creating integrated regional service waste management will ensure the creation of several temporary and permanent jobs. Population will increase incomes and will improve improve living conditions. As for the economic benefit of project implementation, the separate collection of different types of household waste will allow their processing to obtain usable products.</p>
<b>Results</b>	<p>A well organized and effective regional system of waste collection</p> <p>Creation of solid waste disposal facilities in rural partner localities</p> <p>Creation of the necessary conditions for solid waste collection and recycling in Hincesti town</p> <p>Increased capacity for local solid waste collection</p> <p>Reduced negative impact of environmental pollution by waste</p> <p>Improved health and environmental status</p> <p>High levels of information and awareness on the need to reduce waste</p>
<b>Current status of the project</b>	<ul style="list-style-type: none"> <li>• Pre fesability stydy – elaboration and presentation</li> <li>• Technical desigh and graphical materials: sketches, technical drawings, situational plan, general plan, architectural plans - the implementation in October 2010;</li> <li>• General expense estimattion (form 9 according CPL 01.01.2001) confirmed by the consultant – October 2010.</li> </ul>
<b>Implementation period</b>	24 months
<b>Costs</b>	15 160 234,50 lei
