

Project title	NETWORK EXPANSION OF DOMESTIC SEWAGE WATER SYSEYEM IN MINGIR VILLAGE, Hincesti rayon
Location	Mingir village, Hîncești rayon
Applicant	Mingir town hall, Hîncești rayon
Partners	Hîncești rayon council
General objective	Socio-economic development of the village Mingir by extension of the village sewerage system
Short description of the project	<p>Development of infrastructure networks is a primary condition for sustainable rural development and Mingir village revival, subject to migration phenomena, aging and low living standard.</p> <p>Extension of sewerage in the village will contribute directly to socio-economic development of Mingir village, which is the main objective of this action. The direct beneficiaries of the project will be the vast majority of the population, which increases the impact of that action on achieving the objective.</p> <p>Improving living conditions for villagers will be possible through access to sanitation. There will also be reduced health problems due to pollution recorded, due to the lack of sewerage system. But more important, it will be stimulated dynamic repopulation economic situation of the village and town.</p> <p>Raising awareness of the villagers to avoid wastewater disposal in nature is what will ensure the sustainability of the activity in useful time.</p>
Results	<p>Connection of 695 households from Mingir village to the sewerage system</p> <p>Eradication of domestic sewage pollution of soil, subsoil</p> <p>Reducing water pollution from rivers Frumusica Lăpușnita and Prut River</p> <p>Raising population awareness to avoid disposal of waste water in nature and use of sewerage networks</p>
