

Project title	Creating conditions for tourism and sustainable development in village Seliste, Orhei rayon
Location	Orhei rayon, Seliște village (villages Lucașeuca, Seliște șand Mana)
Applicant	Seliște village, Orhei rayon
Partners	<ol style="list-style-type: none"> 1. Ministry for Environment and Natural Resources 2. Ministry for Transport and Road Infrastructure 3. Cadastre Agency;
General objective	Creating conditions for tourism and sustainable development in villages Lucașeuca, Seliște and Mana
Short description of the project	<p>Although Seliste village settlements are in a fairly prodigious favor sustainable development, being in immediate proximity to town. Orhei, there are a number of factors that create a gap in development. In rural villages there have been certified a number of issues that do not allow sustainable development of the localities. However, to achieve this goal it is essential to plan a framework consisting of a General Plan and Spatial Planning.</p> <p>Carrying out the proposed project activities will solve the most acute problems related to waste management and quality road network, will bring a gradual development as a well-established settlement in the General Plan and Spatial Planning will create favorable conditions for attracting funding from various funds that will contribute to solving other existing problems. In addition to this, attractiveness for private investors at home and abroad will increase. Conditions will be created for inclusion in various localities of the village tourist routes, and proximity of Curchi Monastery - one of the most visited tourist attractions in the country and integrating the three localities in the "Orhei National Park"</p>
Results	Conditions for proper waste collection and management in three cities will be created; 4448 people and no more than 30 companies will benefit from waste collection services, some two thousand tons of annual waste within at least 15 years will be collected and stored, 18 unauthorized waste will be eliminated, the museum will be peaks of around 5-6 thousand tourists annually in the early years, the number of companies indirectly involved is over 20, it will increase the flow of people and goods through better roads, settlements will have a General Plan and Spatial Planning.
Current status of the project	In search for financial resouces
Implementation period	19 months
