

Project title	Development of investment opportunities in the village Puhăceni by connecting the village to the national road
Location	Puhaceni town hall
Applicant	Puhaceni town hall, Anenii Noi rayon
Partners	--
General objective	Rehabilitation of the access road to the village Puhăceni in order to reduce costs and increase efficiency of transport of people and goods, increase road safety for road users and residents. Sustainable development of the region by improving the access to the rest area on the bank of Nistru river.
Short description of the project	<p>Repairing and upgrading the access way to Puhăceni would facilitate both access of big trucks that collect from people the production for export, but also the goods transportation with private owned transport.</p> <p>Currently there is an increase in the number of tourists visiting the village during the summer and not only. Migration of the native population for abroad to work and brings some positive results such as rural tourism development. Those who come once, return year after year, and the attractions are: the river Nistru, fruit and vegetables, cheap and environmentally friendly areas, meat, milk, eggs directly from producers and kind people.</p>
Results	The main result of this project will be the 4.2 kilometers of road rehabilitated and upgraded. Also, it is not negligible the work experience gained in project development, but also the need to continue this practice.
Current status of the project	In search for financial resources
Implementation period	12 months
Cost	7155832 lei
